

HealthBridge Application Documentation

Comprehensive Mobile UI Screenshots & Feature Verification Report

Project: HealthBridge Mobile App

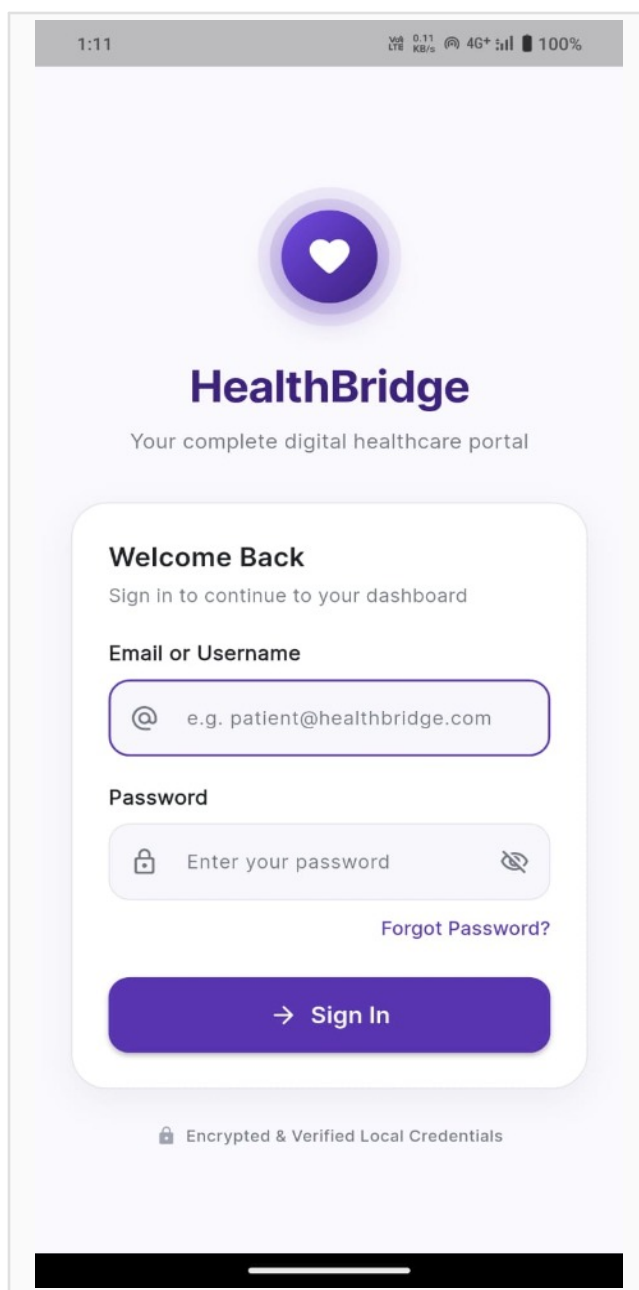

Platform: Flutter Cross-Platform (Android & iOS)

Patient Persona: Sophia Martinez (patient@healthbridge.com)

Architecture: Clean 4-Tier Layered DTOs & Services

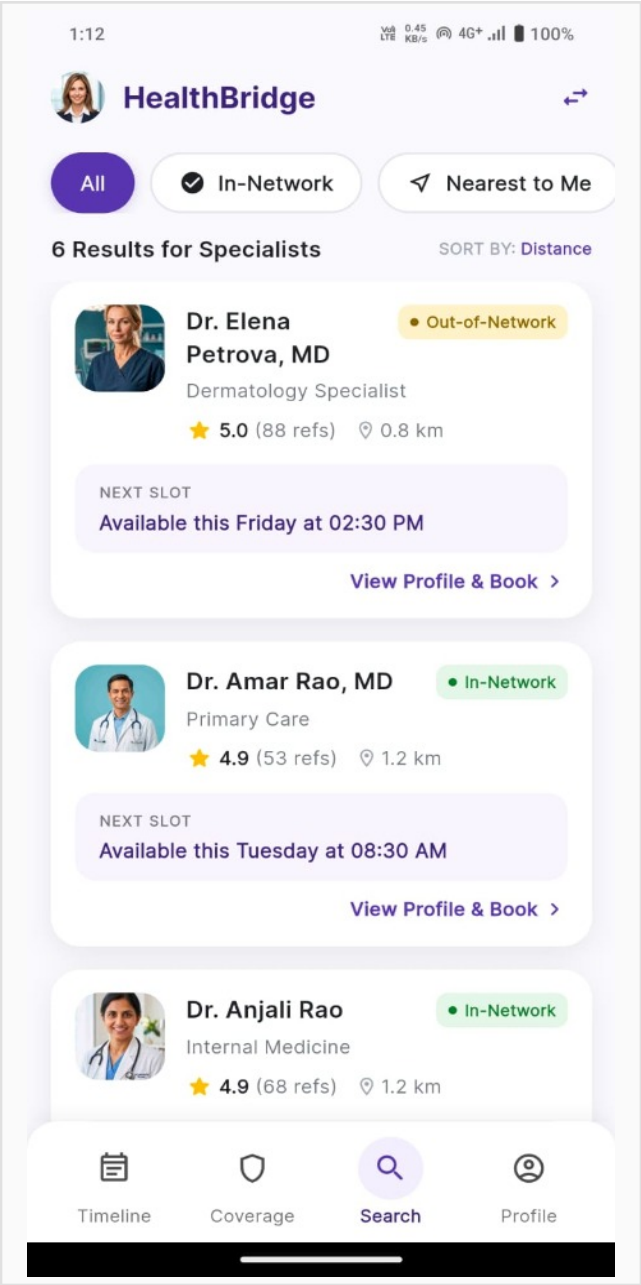

1. Login & Authentication Screen

Manual user credential sign-in portal featuring email/username and password input fields, obscure password visibility toggle, error handling banners, and hero branding header.

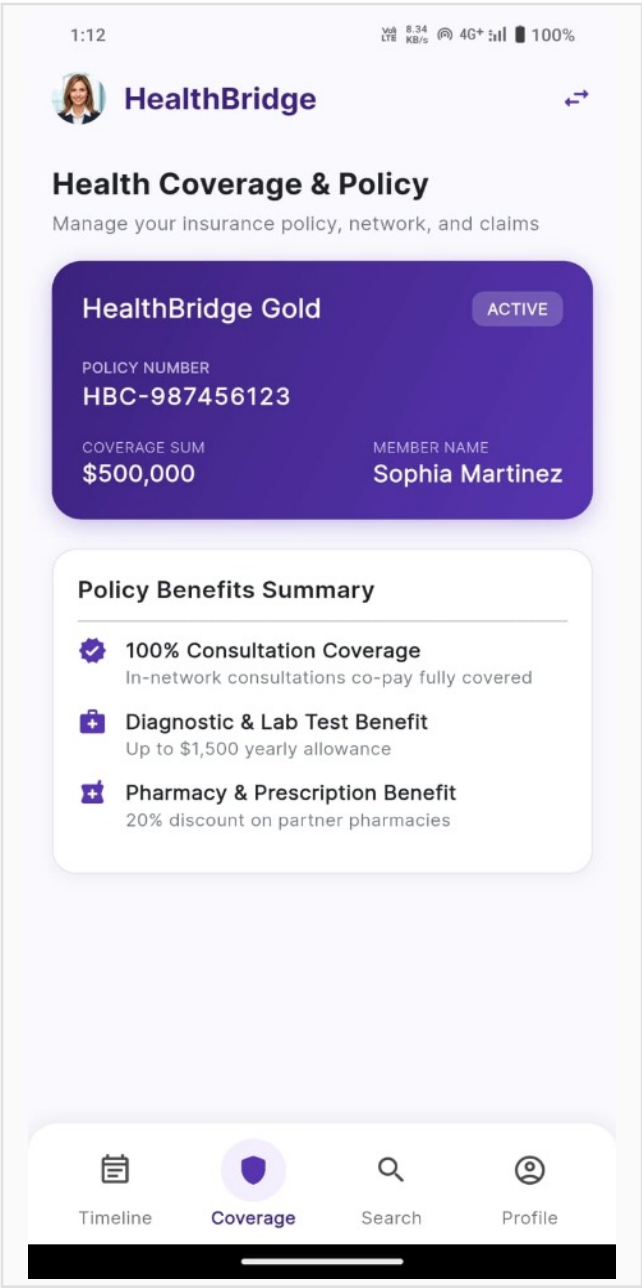

2. Doctor Search & Category Filter Screen

Main doctor listing view displaying category chips (All, In-Network, Nearest to Me), status badges (In-Network, Out-of-Network with bullet dot), ratings, distance in km, uppercase NEXT SLOT availability box, and View Profile & Book action links.

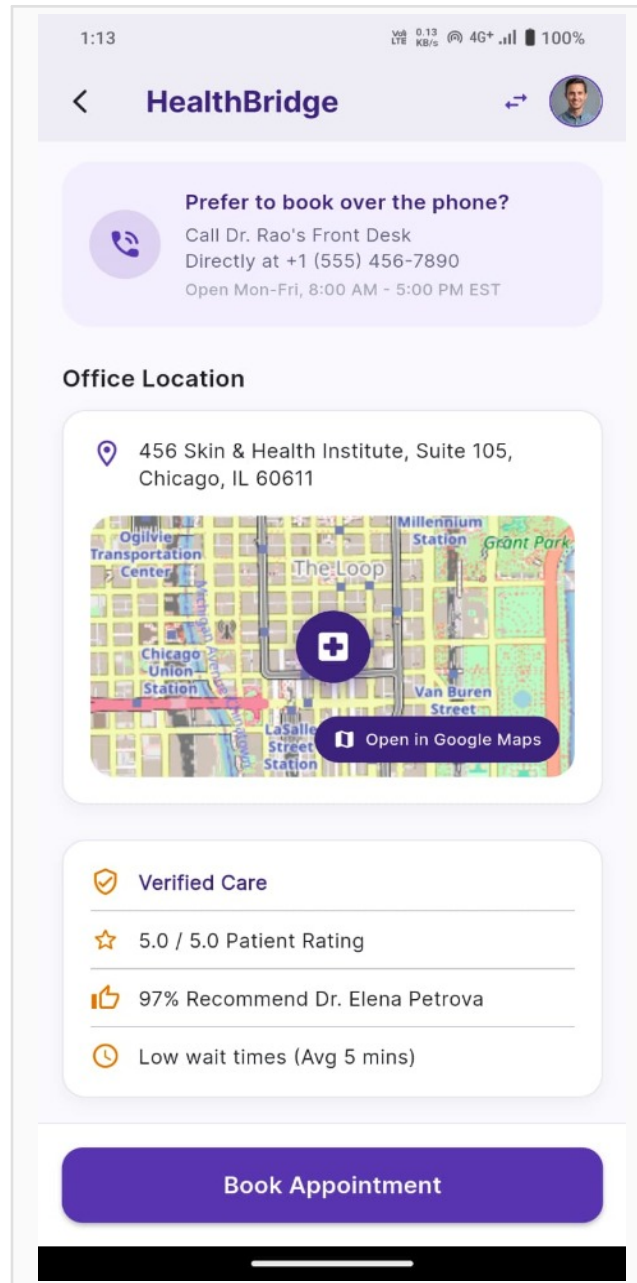

3. Health Coverage & Policy Screen

Active insurance policy management tab showing HealthBridge Gold policy card (Policy #HBC-987456123, \$500,000 coverage sum) and policy benefits summary list.

4. Doctor Profile & Location Screen

Detailed doctor profile screen featuring Call Front-Desk box, interactive office location map with Open in Google Maps action button, verified scorecard metrics (5.0 Rating, 97% Recommend), and sticky Book Appointment button.

5. Appointment Booking Confirmation Screen

Success confirmation screen featuring PHYSICIAN header label, doctor details, date & time, bold HealthBridge Medical Center location title, strikethrough consultation fee breakdown, and FULLY COVERED green badge.
